Who We Are

Aluville Concept Limited designs, fabricates and installs aluminium windows, doors, partitions, curtain walls and shop fronts. Our workshop is in Kiwanga, Mukono, and our installation teams work on homes, offices, shops and hotels across Uganda.

The company was started by two aluminium fabricators, Brian Ochwo and Joel Okello, who between them have more than 14 years on the workshop floor and on site. They still lead every job themselves. That is the main reason clients come back: the people who quote your project are the people who measure it, build it and sign it off.

We are a registered limited company [confirm year of registration] and have completed work for MTN Uganda, National Enterprise Corporation in Entebbe and Heritage Hotel in Rukungiri, alongside private homes and apartments.

14+
Years of combined experience on the workshop floor and on site

2
Founders who lead every job themselves

UG
Homes, Offices, Shops and Hotels across Uganda

Our Mission

Our mission is to give every building we work on aluminium fittings that look good, last for years and are priced fairly.

Our Vision

Our mission is to give every building we work on aluminium fittings that look good, last for years and are priced fairly.

What We Stand For

01. Quality
Genuine aluminium profiles and good glass, cut and assembled to the measurement, not to the nearest standard size.

02. Integrity
The quotation you sign is the price you pay. If something changes on site, we tell you before we act on it.

03. Timeliness
We agree a delivery date at the start and plan the workshop around it.

04. Customer satisfaction
A job is finished when you are happy with it, not when the last screw goes in.

05. Professionalism
Our teams arrive on time, work safely and leave the site clean.

What We **Install**

OUR
PRODUCTS

01

Aluminium **Windows**

Sliding, casement and fixed windows, glazed with clear, tinted or reflective glass.

Each frame is cut to the opening, not to the nearest standard size, so it sits square and seals tight.

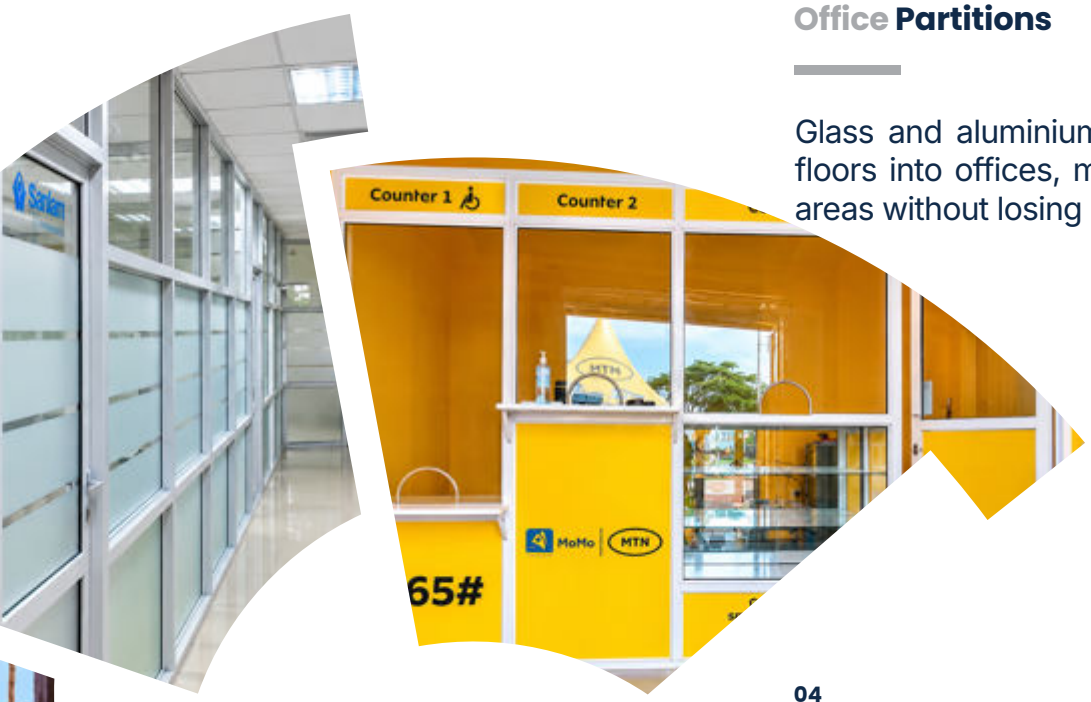

02

Aluminium **Doors**

Sliding doors, hinged doors and frameless glass doors for homes, offices and shops.

Every door is tested for smooth runnung and a secure lock before handover.

What We **Install**

03

Office **Partitions**

Glass and aluminium partitions that divide open floors into offices, meeting rooms and reception areas without losing natural light.

OUR PRODUCTS

04

Curtain Walls and Shop Fronts

Full-height glazed facades for commercial buildings, and shop fronts that put your products on display from the street.

05

Repairs and Maintenance

Replacement of broken glass, locks and rollers, and re-sealing of windows and doors that have started to leak.

We repair our own work and work done by others.

- Every installation uses quality glass, strong profiles and a neat finish.

How We Work

Every project follows the same five steps, led by the founders from the first measurement to the final clean-up.

01

Site visit and measurement

We come to the site, take exact measurements and talk through what you need.

02

Quotation

You receive a written quotation that lists every window, door and panel, the glass type, the finish and the delivery date.

03

Fabrication

Frames are cut and assembled in our kiwanga workshop to your measurements.

04

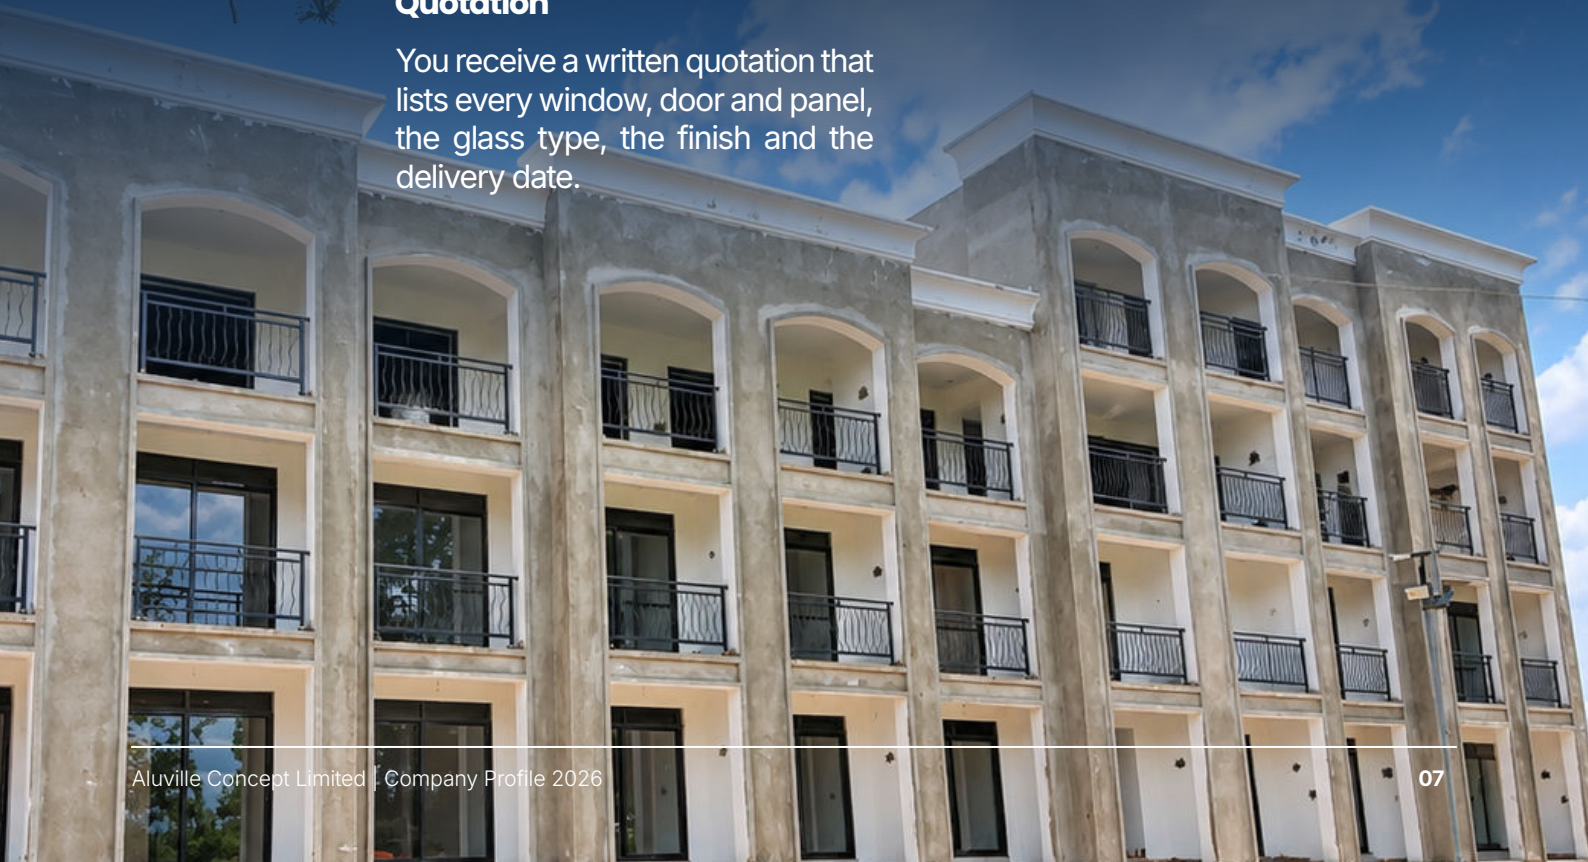

Installation

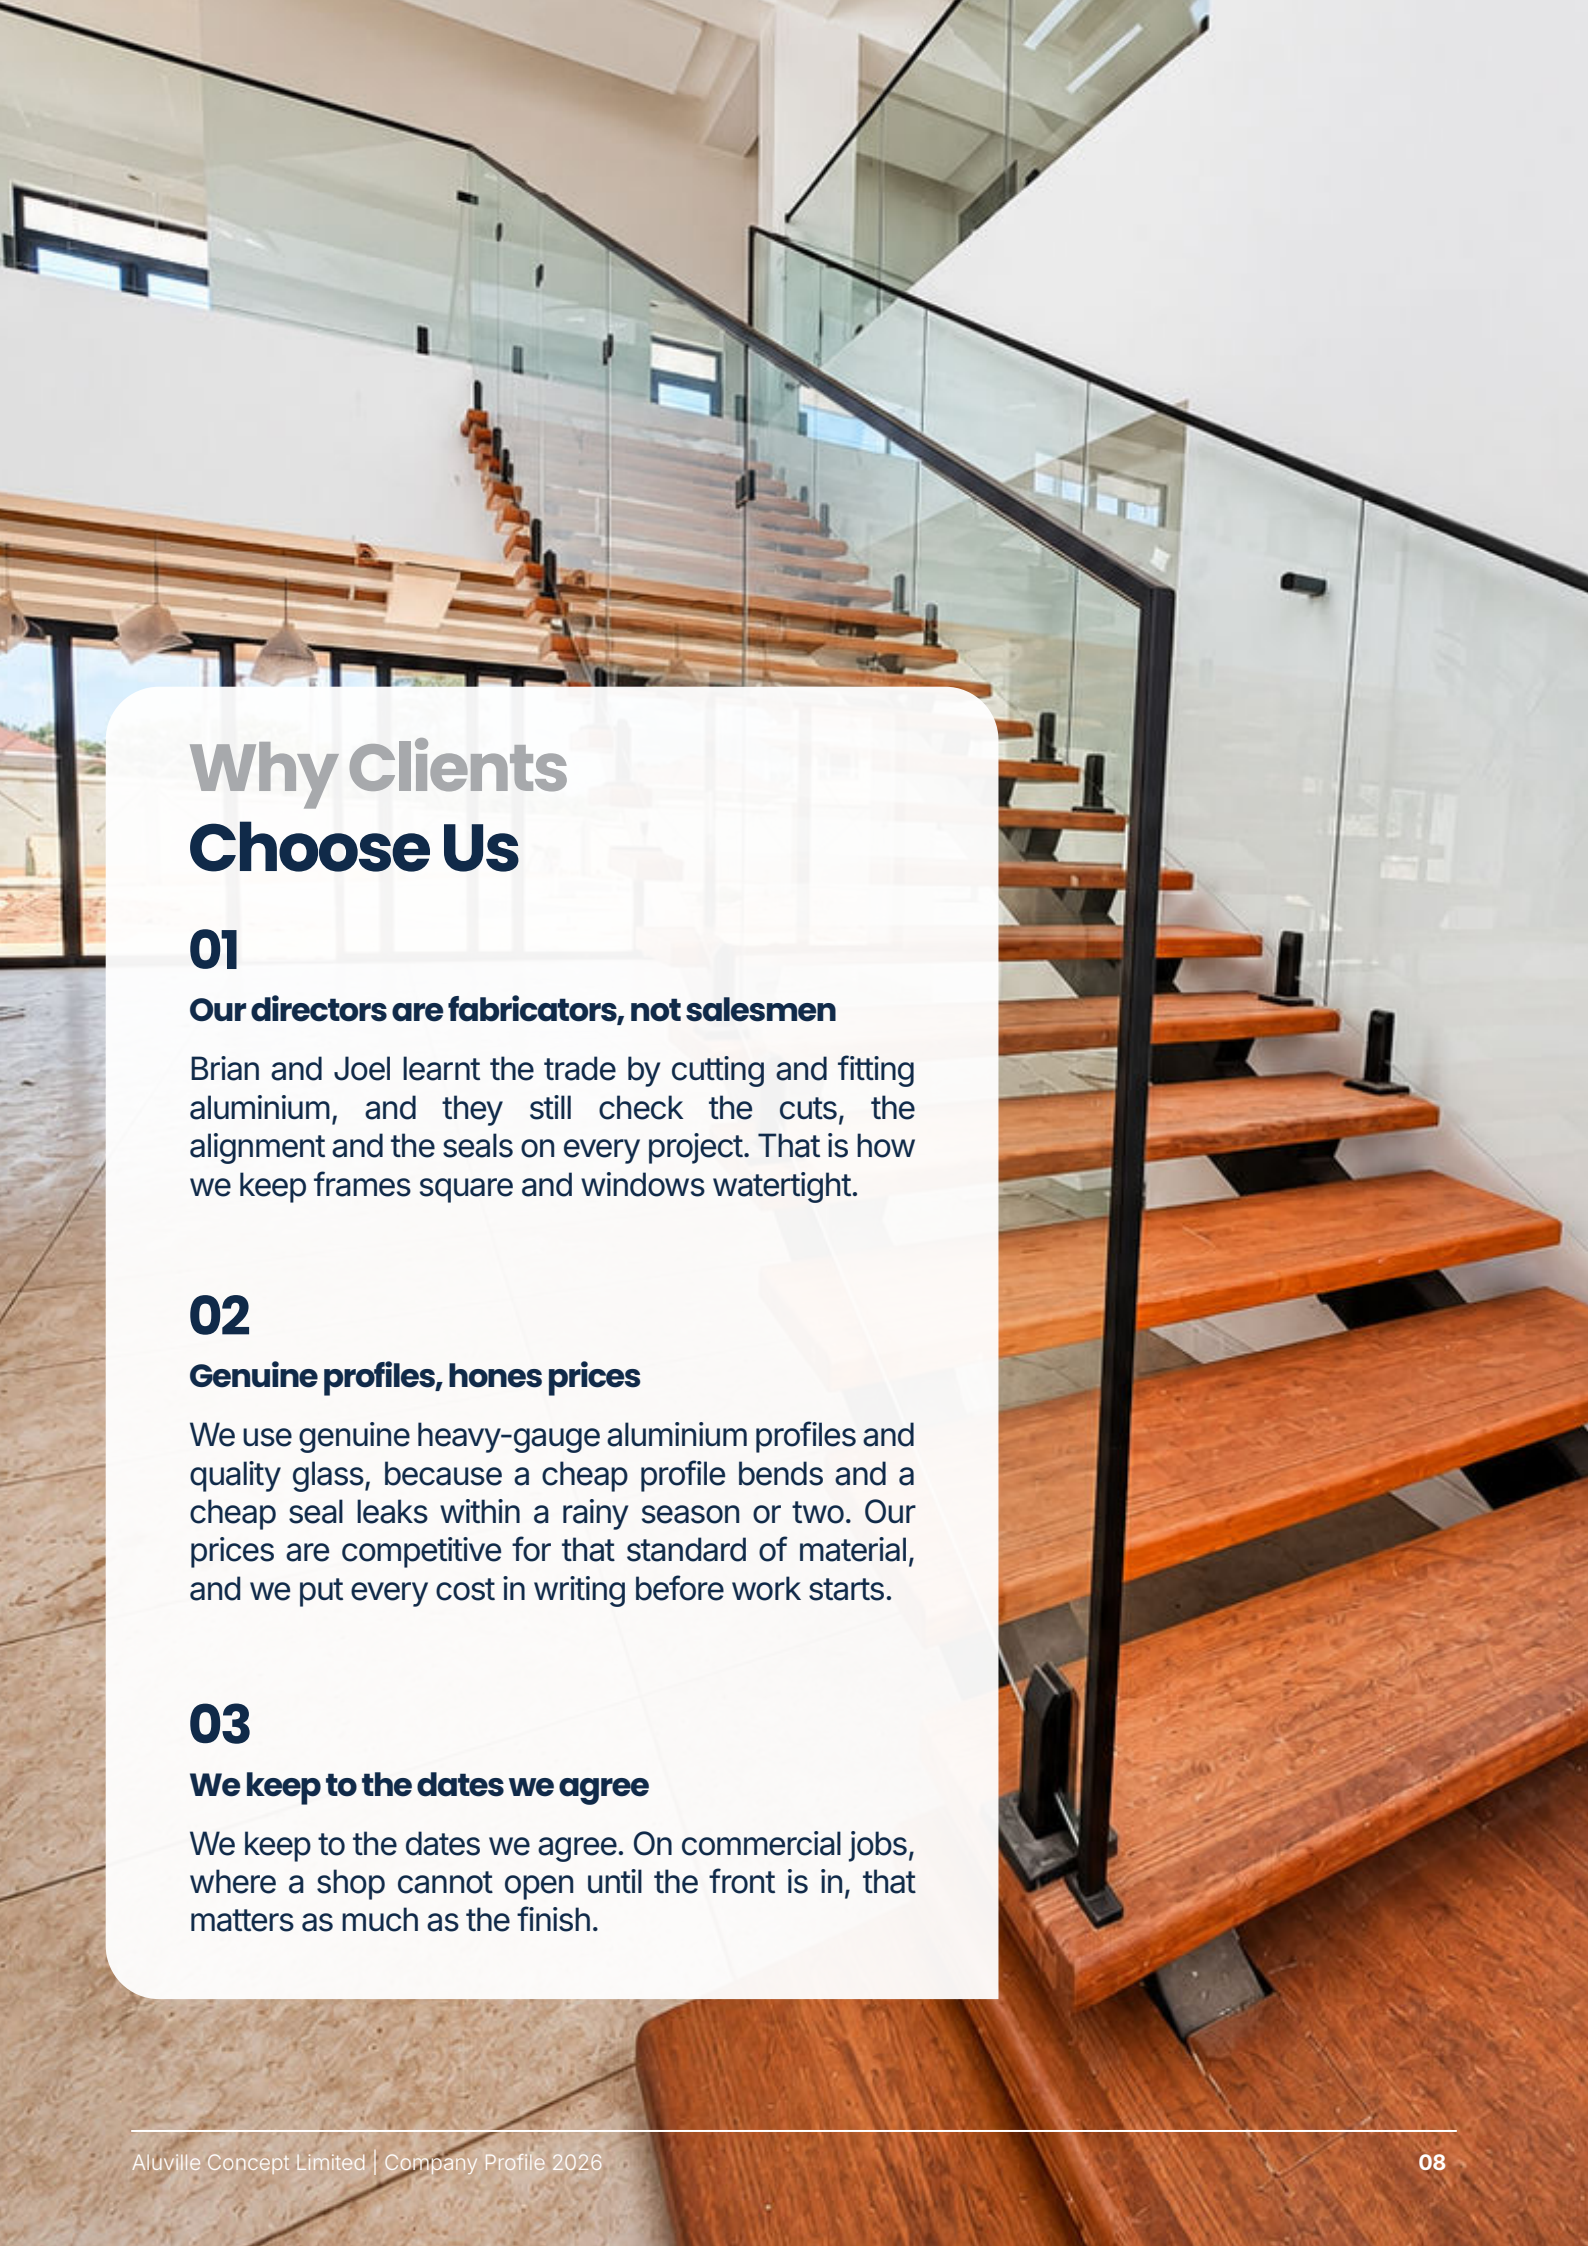

Our team fits, aligns and seals each unit on site, then tests every door and window before handover.

05

Handover and after-sales

We walk you through the finished work and cleanup. If anything needs adjusting later, call us and we will come back.

Why Clients Choose Us

01

Our directors are fabricators, not salesmen

Brian and Joel learnt the trade by cutting and fitting aluminium, and they still check the cuts, the alignment and the seals on every project. That is how we keep frames square and windows watertight.

02

Genuine profiles, hones prices

We use genuine heavy-gauge aluminium profiles and quality glass, because a cheap profile bends and a cheap seal leaks within a rainy season or two. Our prices are competitive for that standard of material, and we put every cost in writing before work starts.

03

We keep to the dates we agree

We keep to the dates we agree. On commercial jobs, where a shop cannot open until the front is in, that matters as much as the finish.

Selected Projects

CLIENT	LOCATION	SECTOR	WORK DONE
MTN Uganda	Retail Shops	Retail / Telecoms	Aluminium doors and windows
National Enterprise Corporaton (NEC)	Entebbe	Commercial / Government	Aluminium doors and windows

Our Leadership

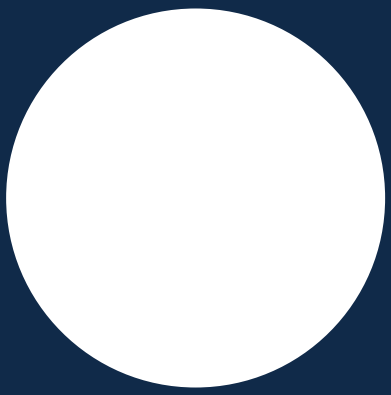

Brian Ochwo
CO-FOUNDER AND MANAGING DIRECTOR

Brian has 7 years experience in aluminium fabrication and site installation. He leads client engagement, quotations and the company's commercial direction, and is the person to speak to about pricing and contracts.

Joel Okello
CO-FOUNDER AND OPERATIONS DIRECTOR

Joel has over 7 years experience in aluminium fabrication and site installation. He runs the workshop and the installation teams, manages project schedules and signs off quality on every job.

Josephine Namaganda
COMPANY SECRETARY / OFFICE ADMINISTRATOR

Josephine keeps the company's records and coordinates meetings and site appointments.

Built with care, Leadership

We handle every project with the same care, from the first measurement to the final clean-up. The aluminium should add value to your building, and the work should be something we are glad to put our name to.
